Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This paper is in response to the papers filed 2/22/08.

Claims 21-27 are under examination in the current application.

Claim Rejections - 35 USC § 103 Maintained

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rossow *et al.* in view of Moormann *et al.* (J of V 1996 Vol 70, No 2, pages 763-770 from IDS).

Applicant argues that it was unexpected to find that virus was produced by cells not capable of being infected and have amended the claims to reflect such.

Applicant's arguments have been fully considered and not found persuasive.

The claims are drawn to a product, not a method of making.

The amendment limitation does not does not change the "isolated polynucleotide" of the claims because "being produced" in a specific host cell is a method step which does not alter the product being claimed.

The "isolated infectious RNA molecule" requires the structure as defined in the recited deposit. The prior art supplies this material.

Applicant has not argued that the prior art does not teach the recited virus and has not argued that Moormann *et al.* and one of ordinary skill in the art would not be able to make such clones and polynucleotide molecules.

Applicant's argued unexpected result may have weight as a step in a method claim but as explained above it does not alter the product claimed and thus does not differentiate the claim over the rejection of record.

Applicant has not rebutted the *prima facie* argument put forth in action mailed 8/22/07 as to why the invention now claimed would not have been obvious at the time of invention. Applicant's arguments focus on making virus, not the polynucleotides recited in the claims.

The rejection is maintained.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1648

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
